## HIGH-PRIORITY UNFUNDED NEEDS

Jan. 2022

# INTRODUCTION

## **Message from Missouri Department of Transportation Director Patrick McKenna**

The state transportation system is a tremendous asset to the citizens of Missouri. The system consists of 33,830 miles of roads and 10,399 bridges, both of which rank among the largest for any state in the nation. Over the last 10 years, Missourians have invested in 4,300 projects totaling \$10.9 billion to maintain and improve the system. Looking forward, \$7.5 billion is estimated to be available for projects over the next five years. Although Missouri's current road and bridge program has focused on keeping our transportation system in its current condition, MoDOT's publication, *The Citizen's Guide to Transportation Funding in Missouri*, identifies \$1 billion in high-priority, unfunded annual transportation needs.

Since transportation needs greatly outweigh funding available, the challenge is determining the optimal projects to fund that provide the greatest return on investment to taxpayers. Across every region of the state, feedback from Missourians has consistently prioritized maintaining the existing system as the highest priority. Other priorities include projects that improve safety, spur economic growth and provide more transportation choices. MoDOT staff have worked with Metropolitan Planning Organizations and Regional Planning Commissions throughout the state to develop a list of high priority unfunded road and bridge needs.

We have generated project-specific lists of \$4.5 billion of road and bridge projects in three tiers. Tier one includes \$543 million and includes projects we could accomplish in the time of the current five-year Statewide Transportation Improvement Program (STIP) as federal and state funding levels increase. These projects have good estimates. Tier two is worth \$2.1 billion and includes projects beyond the current STIP timeframe with broader estimates. Tier three includes \$2.2 billion of projects that are also beyond the current STIP timeframe with broader estimates. In addition, MoDOT staff worked with the planning partners to identify \$1 billion in multimodal needs.

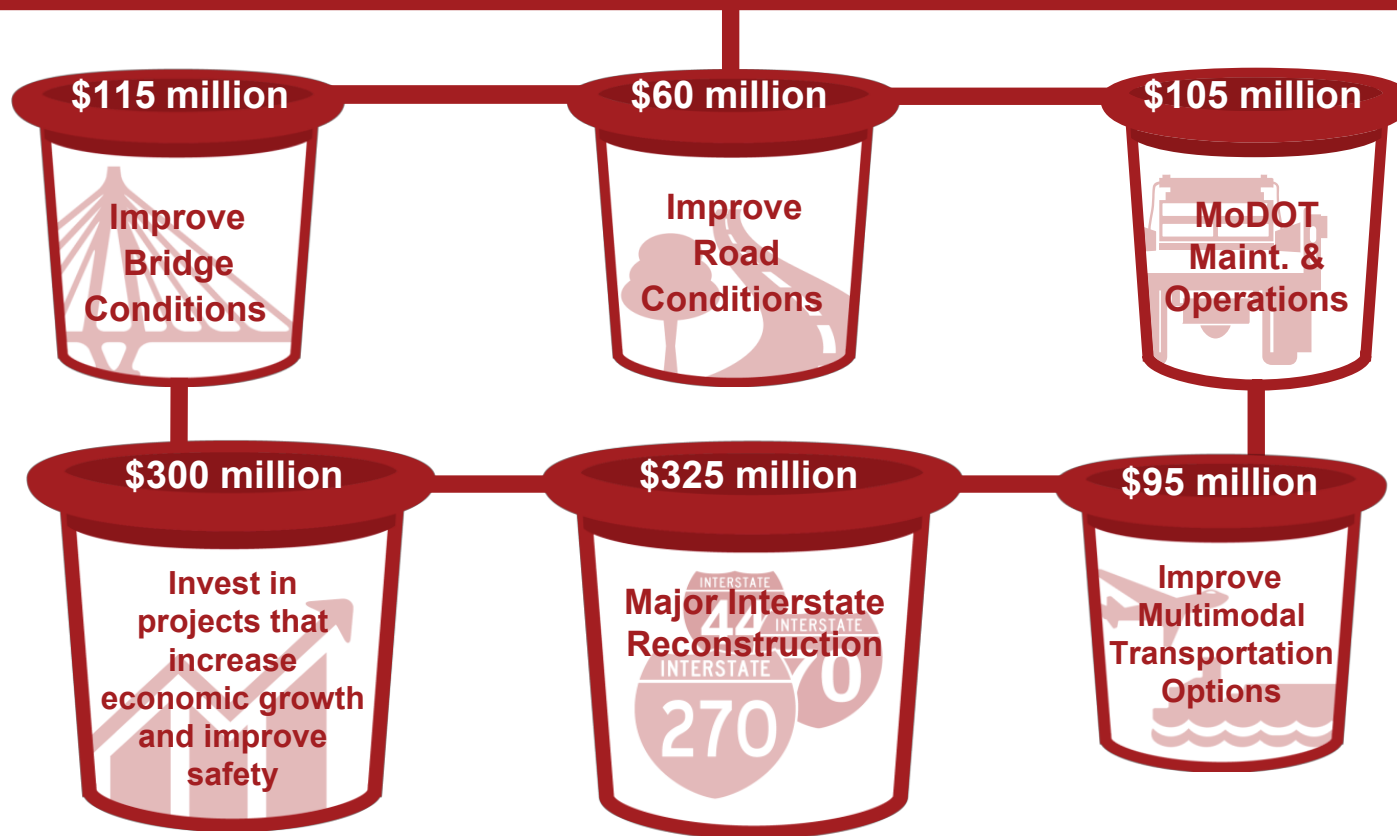

With the priority of maintaining the existing system, MoDOT has developed asset management plans for each district with the goal to maintain current pavement and bridge conditions. The asset management plans focus on preventive maintenance improvements to keep good roads and bridges in good condition. Research shows preventive maintenance solutions, such as cyclical overlays on roads in good condition, are the most cost-effective approach to taking care of road and bridge assets. If preventive maintenance investments were not made, the cost of improving the asset in poor condition can cost four to ten times more. The projects in the STIP deliver what taxpayers have asked for – take care of the existing system.

Each MoDOT district receives funding to invest in Missouri's transportation system. Since 2003, the Missouri Highways and Transportation Commission has used a formula to distribute construction program funds for road and bridge improvements to each of its districts. The formula provides funding for safety improvements, asset management and system improvements. The increase to the state motor fuel tax this year will be phased in over the next five years, adding 2.5 cents each fiscal year. As the state fuel tax grows to 29.5 cents, we will be positioned and ready to deliver prioritized projects. Through the regional planning prioritization process, MoDOT staff have worked together with our planning partners to develop the following list of high priority unfunded needs. This continuous effort positions us to clearly communicate the transportation needs of each region of the state and react quickly to potential funding opportunities at both the state and federal levels.

# INTRODUCTION

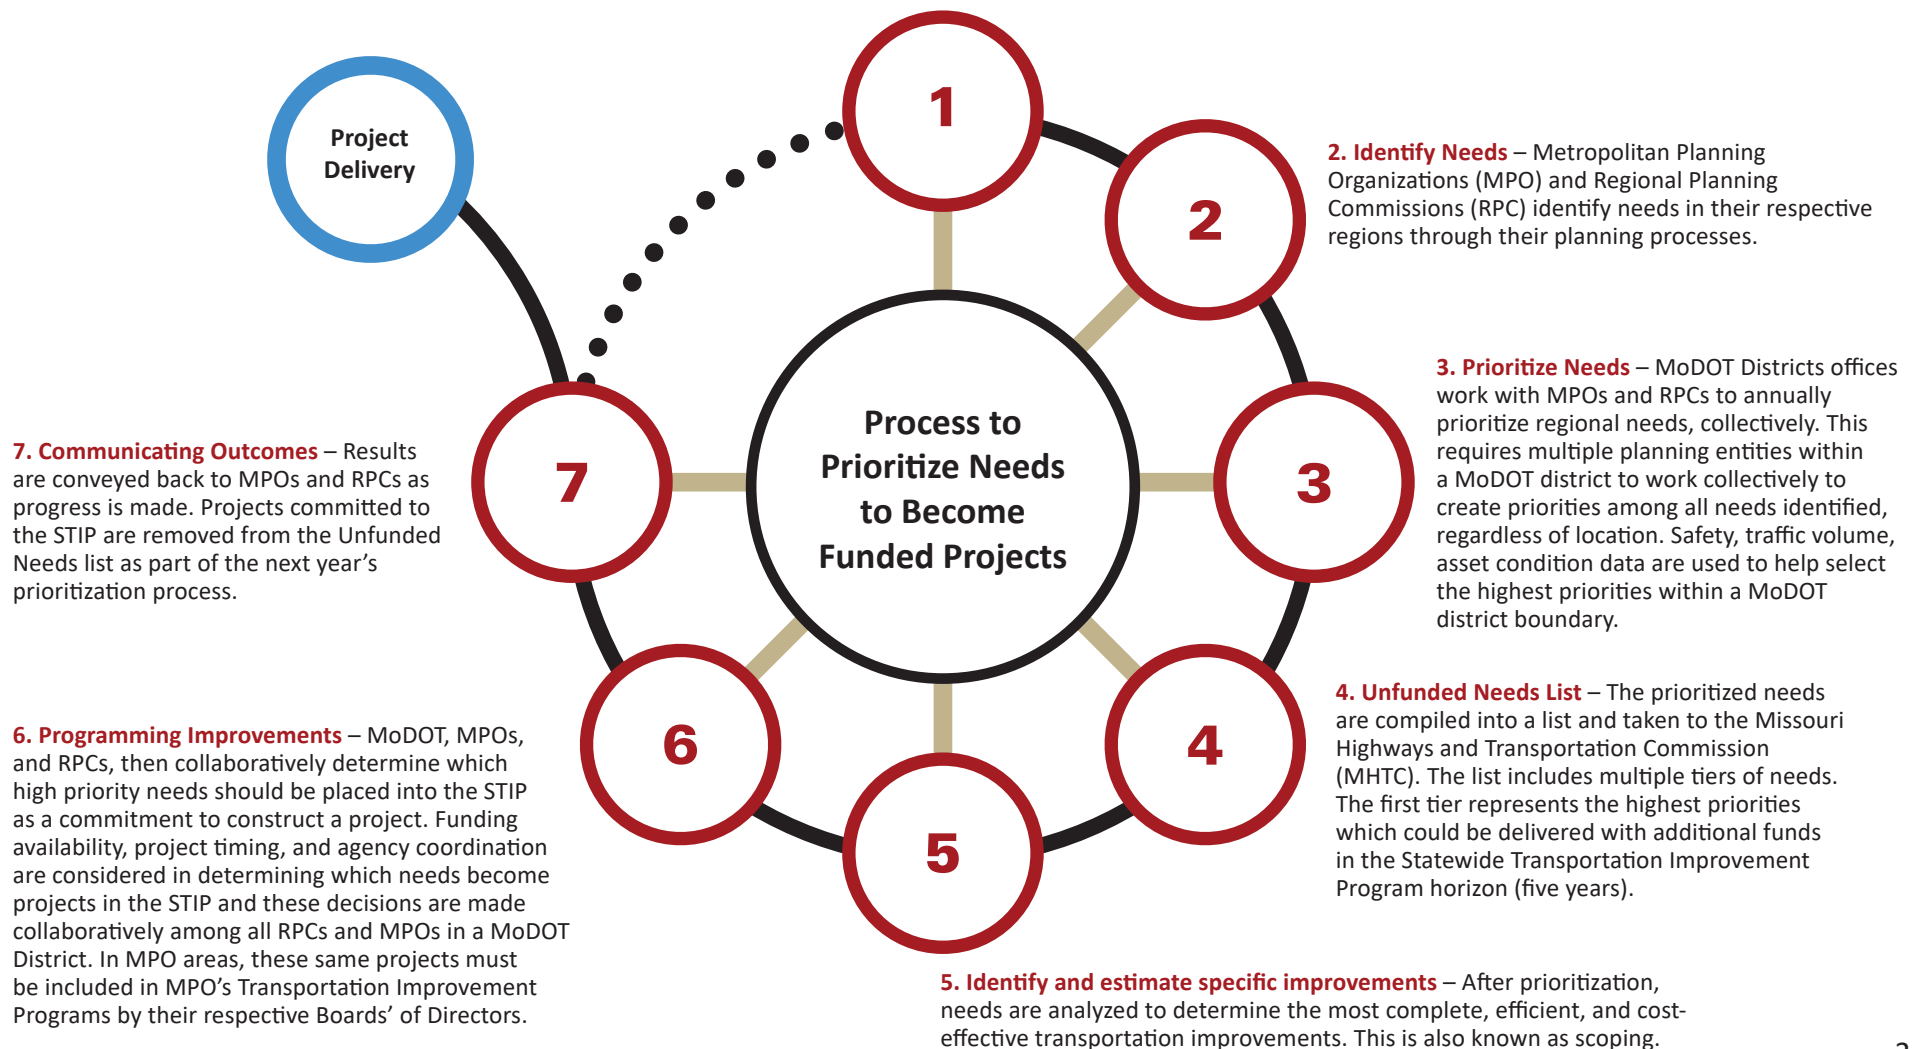

Missourians have repeatedly communicated the number one goal for MoDOT is to take care of the existing system of roads and bridges, so the majority of taxpayer dollars for transportation are invested in asset management projects. Current funding levels are only sufficient to maintain the transportation system in its current condition leaving many transportation needs unfunded. While the latest Citizen's Guide identifies \$825 million in annual transportation needs, MoDOT has applied inflation bringing this number to \$1 billion which totals \$10 billion over 10 years.

## HIGH-PRIORITY UNFUNDED ANNUAL TRANSPORTATION NEEDS \$1 billion

# INTRODUCTION

**1. Establish a vision** – MoDOT’s vision for its transportation future is best captured by the five goals established by Missourians in the Long-Range Transportation Plan. In priority order, they are: 1) Take care of the transportation system; 2) Keep all travelers safe; 3) Invest in projects that spur economic growth and create jobs; 4) Give Missourians better transportation choices; and 5) Improve reliability and reduce congestion.

# INTRODUCTION

**\$115 million**

**Improve  
Bridge  
Conditions**

**Improve Bridge Conditions** – Missouri has 10,399 bridges of varying sizes. Currently, 837 bridges, or 8%, are in poor condition. Investing an additional \$115 million each year for ten years would decrease the number of poor condition bridges to approximately 300, or 3% of the total bridges.

**\$60 million**

**Improve  
Road  
Conditions**

**Improve Road Conditions** – Missouri's state highway system consists of approximately 34,000 miles, the seventh largest in the nation. The majority of travel occurs on the 5,556 miles of interstate and major routes – 91% of these routes are in good condition. Minor routes account for 16,834 miles of the system – 82% of these routes are in good condition. The low volume routes, which carry less than 400 cars per day, account for 11,440 miles – 71% of these routes are in good condition. Investing an additional \$60 million each year for ten years would preserve the current condition of interstate, major and minor routes and improve the condition of low volume routes from 71% to 80% good condition. The majority of the investment, \$50 million each year, is needed to improve and maintain low volume routes.

**\$105 million**

**MoDOT  
Maint. &  
Operations**

**MoDOT Maintenance & Operations** – MoDOT employs 3,000+ field employees throughout the state to operate and maintain the transportation system. Services include pavement repairs, winter operations and mowing roadsides. To continue the current level of service, an additional investment of \$105 million per year is needed to keep pace with inflationary cost increases.

# INTRODUCTION

**\$300 million**

Invest in projects that increase economic growth and improve safety

**Invest in projects that increase economic growth and improve safety** – These projects include new interchanges, adding shoulders with rumble stripes and adding lanes to the current system. In addition to congestion reduction and economic growth benefits, all of these projects would improve safety so fewer fatalities and serious injuries occur. An additional investment of \$300 million per year would allow MoDOT to begin meeting those needs.

**\$325 million**

Major Interstate Reconstruction

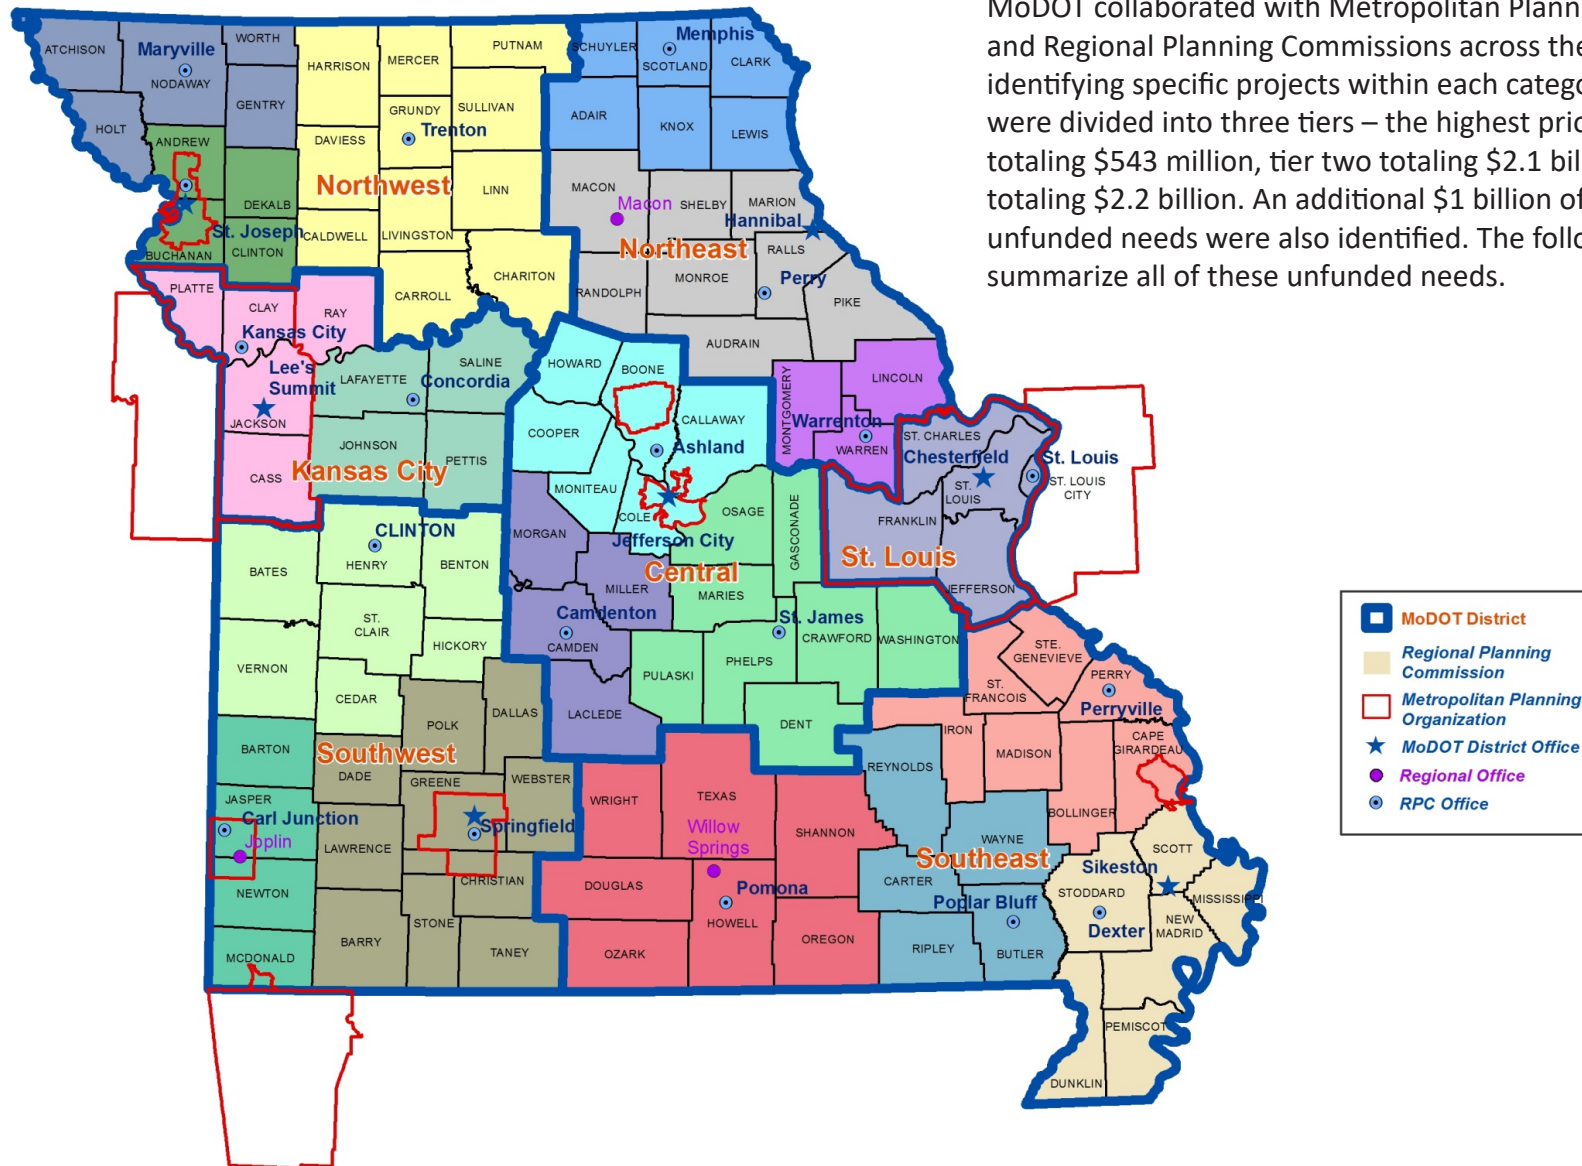

**Major interstate reconstruction** – The nation's interstate system is over 60 years old, and Missouri's interstates were built with a 20-year life expectancy. Missouri's interstates need to be reconstructed with added capacity to reliably handle mounting levels of traffic, especially long-haul trucks. An additional \$325 million per year would allow MoDOT to begin tackling this long overdue improvement.

**\$95 million**

Improve Multimodal Transportation Options

**Improve multimodal transportation options** – Many Missourians rely on non-highway modes of transportation; however, the state currently invests very little money toward those needs. Missouri's transit systems, railroads, ports, waterways, airports and bicycle/pedestrian facilities could begin to see much needed improvements with an annual investment of \$95 million each year.

# INTRODUCTION

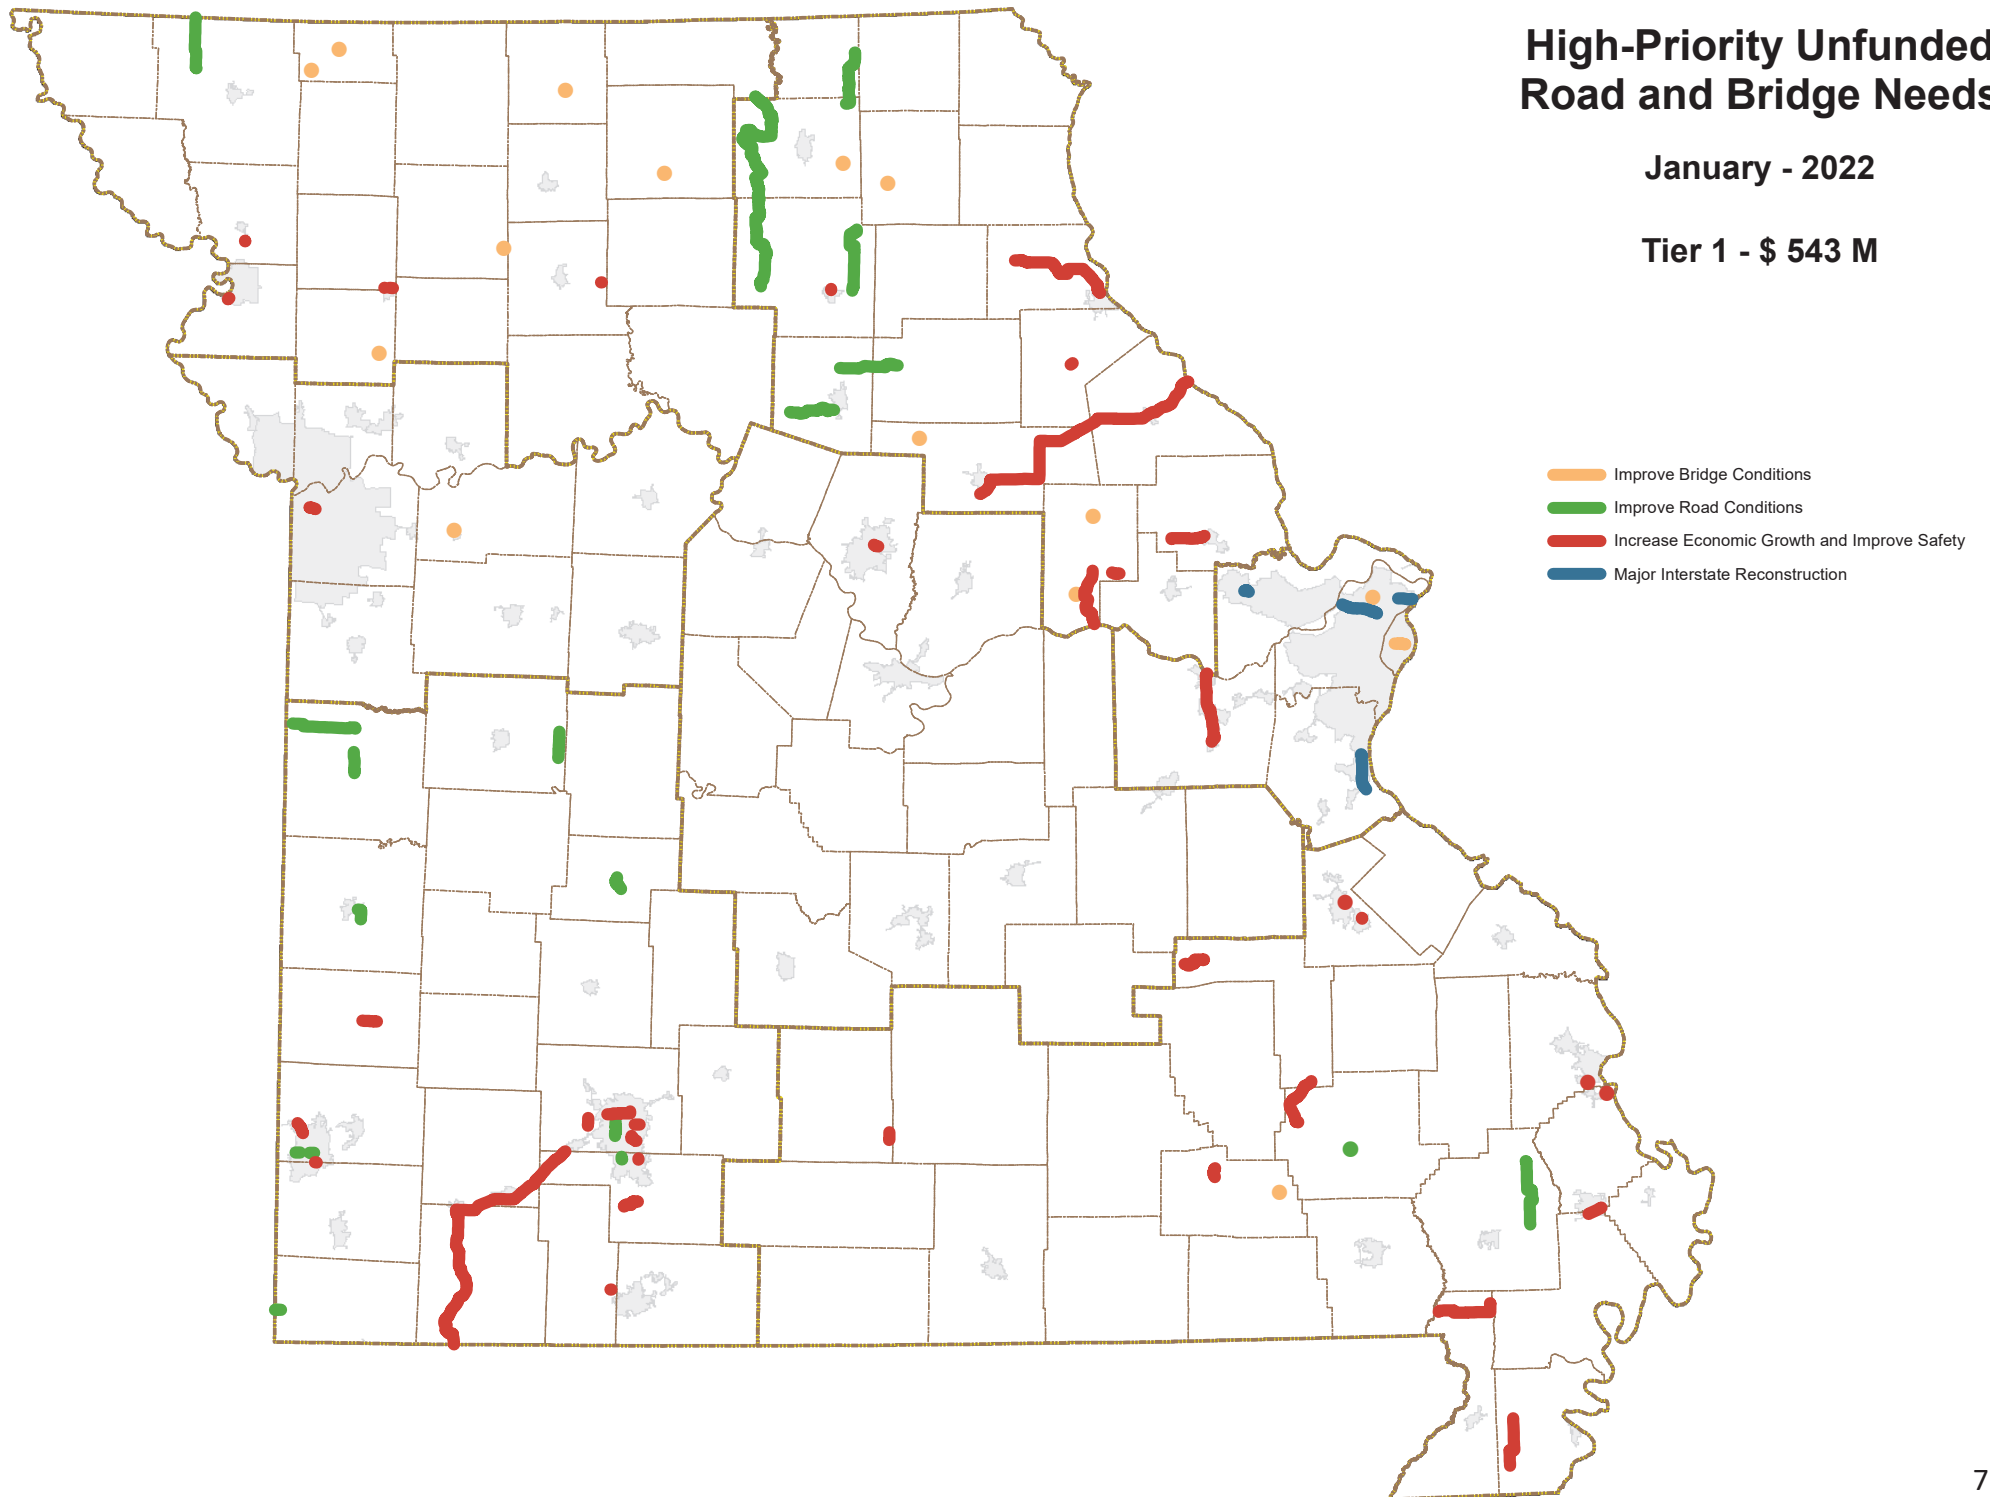

MoDOT collaborated with Metropolitan Planning Organizations and Regional Planning Commissions across the state to begin identifying specific projects within each category. The projects were divided into three tiers – the highest priority tier one totaling \$543 million, tier two totaling \$2.1 billion and tier 3 totaling \$2.2 billion. An additional \$1 billion of multimodal unfunded needs were also identified. The following pages summarize all of these unfunded needs.

## Major Bridge Needs - January 2022

Missouri has 10,399 bridges, including 207 major bridges that are longer than 1,000 feet, or about the length of three football fields. Major bridges are managed and prioritized centrally by MoDOT, rather than by the district offices and local planning partners. The following list shows the next major bridges to be worked on in the next ten years and their estimated costs.

DISTRICT	TOTAL
NORTHWEST	\$47,024
NORTHEAST	\$47,136
KANSAS CITY RURAL	\$28,186
KANSAS CITY URBAN	\$182,000
CENTRAL	\$117,165
ST. LOUIS	\$374,321
SOUTHWEST RURAL	\$95,905

## Statewide Unfunded Needs - January 2022

In addition to the needs previously identified, MoDOT has determined there are several needs that span the state. If fulfilled, these needs could help improve the condition of our roads and bridges, increase safety and mobility and improve multimodal options. The following list shows these statewide needs.

STATEWIDE UNFUNDED NEEDS - JANUARY 2022		
DESCRIPTION	TOTAL COST (\$1000)	CATEGORY
RECONSTRUCT AND ADD CAPACITY TO I-70 FROM EAST OF KANSAS CITY TO WEST OF ST. LOUIS (ESTIMATE ASSUMES OTHER I-70 PROJECTS IN TIERS 1-3 COMPLETED)	\$1,400,000	MAJOR INTERSTATE RECONSTRUCTION
REPLACE OR UPGRADE SIGNS, SIGNALS, CAMERAS, LIGHTING, STRIPING, AND GUARD CABLE	\$90,800	INCREASE ECONOMIC GROWTH AND IMPROVE SAFETY
RECONSTRUCT INTERSTATE AND ADD OUTER ROADS TO INCREASE INTERSTATE RESILIENCY (PARTIAL)	\$100,000	MAJOR INTERSTATE RECONSTRUCTION
ANNUAL PROGRAM TO IMPROVE THE CONDITION OF LOW VOLUME ROADS	\$25,000	IMPROVE ROAD CONDITIONS
